MSOL has released new Quality/Defect management features to PROEVER.

April 5, 2021

PROEVER, which has covered a variety of management areas, has released the first in a new series of Quality management feature, "Defect Management".

PROEVER is the software that accumulates the knowledge of management solutions. MSOL has supported the execution of project management in many large companies as well as smaller ones. PROEVER educates project managers and PMO to lead projects to success by improving the competency of an organization.

Our Mission is to contribute to society's happiness through management. We help companies to solve their project management problems with PROEVER and would like to achieve social happiness.

Key Features and Changes

· **Quality management/Defect Management**

· **Business model patent pending**
  PCT/JP2019/018308
 **Japanese Patent Application No. JP : 2020-040573/JP : 2020-121838/JP : 2020-183165**

In a project to create a new product, it is essential to visualize and analyze the quality status. We have extracted the elements and perspectives necessary for successful defect management from the know-how we have accumulated from the many projects we have supported, and included them in PROEVER as standard templates. It can be used by those who do not have much experience in quality analysis and quality improvement.

By using this function, it can be accurately seen a series of actions from the occurrence to the resolution of defects (failures and bugs) that occur in the testing phase or after release. In addition, by adding information necessary for quality evaluation such as the location, cause of occurrence and incorporation, the quality status can be understood immediately and it accelerates decision making.

As part of our quality management series, MSOL plans to release new features in the future, including quality enhancement and analysis in upper process of projects.

PROEVER will release new features such as project review and human resource skill check in the future. For more information : https://www.msols.com/en/business/software/contact/
